FTAs and their discontents

India's balance of trade has worsened with countries with which it has signed free trade agreements

New Delhi, 1 December

ndia's new-found eagerness to sign a slew of free trade pacts with key trading partners has revived the old question of whether the existing free trade deals have actually benefited the country.

Till date, India has signed 13 free trade agreements (FTAs), key among them being Japan, South Korea and the ASEAN (Association of Southeast Asian Nations) grouping.

During the first half of the fiscal current (April-September), imports from these Southeast Asian countries grew at a much faster pace compared to exports. For the 10-member ASEAN nations, imports grew 56.33 per cent compared to an 11.61 per cent growth in exports. Outbound shipments from India to Japan witnessed a 5 per cent contraction, while imports saw nearly 11 per cent growth. Similarly, in the case of South Korea, imports jumped 38.78 per cent, compared to a mere 2.69 per cent growth in outbound shipments.

A report published earlier this month by Delhi-based think tank Global Trade Research Initiative (GTRI) shows a comparison of the data from pre- and post-FTA periods of 2007-09 and 2019-21 — the first FTA was signed in 2010 respectively. During this period, India's merchandise trade deficit with these three key FTA partners — Japan, South Korea and ASEAN — increased at a faster pace than its global trade deficit. The jump was the sharpest in the case of ASEAN (201.5 per cent), followed by South Korea (142.5 per cent),

and Japan (120.6 per cent). In comparison, India's such as the trade inability to follow overall deficit grew only by 43.1 per cent during this period. high

import duties in exports efforts India came down post-FTA, India's FTAs have provided immediate and sharp price advantages to partner country firms exporting to India, over their competitors. But Indian firms exporting to partner countries had no such luxury, as MFN duties were

countries. This led to a high trade deficit. Hence, we say FTAs serve partner countries and not our interests." Ajav Srivastava, co-founder of GTRI, said. The MFN or the Most Favoured Nation status refers to the protocol that requires countries to offer the same trade terms or customs duties to all World Trading Organization partners.

But Sachin Chaturvedi. director general at Research and Information Non-tariff barriers,

System Developing (RIS), Countries though said imports from these countries had grown at a faster pace compared to

India's exports, it was important to note that in the case of Japan and ASEAN. imports of parts and components had a higher share than that of finished goods. "This has only added to our export basket," he pointed out.

zero or low in most partner trade deals with countries such United Kingdom (UK). Canada

may see \$30-bn investment

WINDS OF CHANGE

as South Korea, exports from India faced non-tariff barriers. Therefore, there is a need to the agreement," Chaturvedi said.

Another challenge that experts pointed out is the poor utilisation of the existing FTAs. The reasons range from the cumbersome process of getting a certificate of origin and the related manual verification process to low awareness about FTAs in the industry. Non-tariff barriers, such as the inability to follow certain standards in the partner country, also hinder India's exports efforts.

Since the start of the year. India has signed two trade agreements — with the United Arab Emirates (UAE) in a record 88 days and another one with a developed nation, Australia. The agreement with the UAE kicked in from March, while the Australia FTA is scheduled to kick in from December 29.

India is also negotiating FTAs with some other key "However, in the case of developed nations such as the omists consider India's

and the European Union (EU). These nations are not only India's key export markets but the economies also have greater complementarities. On the other hand, Southeast Asian countries often compete with India for exports of labour-intensive products and information technology jobs.

The shift in focus towards signing trade deals with Western developed countries has been aided by rising anti-China sentiment among these economies following Covid-19-related disruptions and the focus on diversifying supply chains under the Chinaplus-one strategy.

Commerce department officials had earlier said that fast-tracking these bilateral trade deals assume greater significance now since India is not part of any local or regional arrangement. FTAs can also help India achieve an ambitious target of exporting goods and services worth \$2 trillion

Arpita Mukherjee, profes-Indian Council for Research on International Economic Relations, said gains from FTAs India signs with its key export markets will be greater if the trade deals are comprehensive.

"However, if India is unable to remove some of the restrictions on foreign direct investment and lower tariffs, partner countries may offer a lower level of liberalisation than what they offered to their other FTA partners. In that case our exporters will be at a disadvantage even after the agreement," she pointed out.

According to Ajay Sahai. director general and chief executive officer of Federation of **Indian Exports Organisations** (FIEO), FTAs are also of strategic consideration now. "I think partnerships with countries such as UAE and Australia are a win-win on both sides. India will be able to make manufacturing exports competitive by importing duty-free raw materials and intermediate goods from these sources, and get greater market access by exporting value-added products to these countries because they are not producing the same items in sizeable numbers," he said.

In this FTA signing spree, however, the big question remains: whether India will opt back into the Regional Comprehensive Economic Partnership (RCEP), the first FTA between Asia-Pacific nations. Although India had been part of the drafting committee for the agreement, it opted out in November 2019 on the grounds that the country's concerns were not being addressed. As one of the world's largest such trade agreements, trade econabsence as significant.

How Digi Yatra reads user's face as the boarding pass

Mumbai, 1 December

On Thursday, Civil Aviation Minister Jyotiraditya Scindia

launched Digi Yatra, a facial recognition technology-based system to provide a hasslefree travel experience to air travellers.

First announced in October 2018, the scheme was formally rolled out at airports in Delhi, Bengaluru and Varanasi on Thursday. A beta trial was carried out at airports in Delhi, Bengaluru and Hyderabad from August 15 and the working of the app was finetuned based on passenger feedback. Let us take a look at how it works:

passengers?

It enables paperless and con-

check and boarding gate. Apart from saving time, it also brings more convenience. While passengers take up to 20 seconds to enter the passenger terminal at Delhi, with the Digi Yatra app the time taken

was five seconds

Association says

that of the total

offshore potential

According to government estimates. as many as 14 locations with the potential to generate around 25 gigawatt (Gw) of wind energy have been identified in Denmark is betting big on India's wind offshore market potential. In September last year, the setting up of a 4-10-Gw

energy island — an offshore wind farm in the Gulf of Mannar — was one of the key topics of discussion during Denmark Energy Minister Dan Jannik Jorgensen's visit to India.

However, Indian energy experts observe that in the absence of VGF, offshore wind farms will be unviable.

According to industry estimates, the per-megawatt cost of setting up an offshore wind power plant is ₹8-10 crore.

"If one wants to install a turbine, the cost of power is likely to be ₹8-9 per unit. The government is now talking about auctioning the wind site without any VGF. If VGF is not there, who will buy power at ₹9 per unit? Offshore wind energy will not take off without viability funding," said D V Giri, secretary-general, Indian Wind Turbine Manufacturers Association.

The association says that of the total

offshore potential of about 70 Gw in India, 35 Gw will be in TN. The state has already put forward four initial sites for the first auction of 4 Gw equivalent seabed in 2022-23. These will be leased to carry out required studies and surveys and subsequent project development under an entry advisory services of SAS Partners, open-access model.

India and Denmark have launched a knowledge hub The Indian called the Centre of Excellence for Offshore Wind Manufacturers and Renewable Energy to play a crucial role in facilitating, accelerating, and implementing India's offshore of about 70 Gw in wind strategy.

India, 35 Gw will "The Indo-Danish collabbe in Tamil Nadu oration in offshore wind energy is expected to create sig-
